

AURIS NOBLE LLC

Auris Noble is an ISO 9001:2015 Quality System Registered company a vertically-integrated recovery facility that manages high value, critical and strategic materials generated from diverse industries. From aerospace to telecommunications, and literally everything in between, we are united by our desire to maximize value for our customers. Our specialization is the development of novel (some call it boutique), science-driven solutions for the recovery of out-of-the-box materials containing precious, rare earth and strategic materials. Our elemental and separation science experience ranges from Aluminum through Zirconium.

# WHY CHOOSE AURIS NOBLE?

At Auris Noble, we prioritize your needs by providing responsive, flexible, and compliant solutions tailored to your requirements. Our team is dedicated to delivering better, faster, and/or cheaper outcomes, ensuring that your goals are met efficiently and cost-effectively.

# OUR PROCESS

01

## Sample Reception and Analysis

Auris Noble begins by receiving a sample, where the presence of Iridium is verified, and its viability determined. This initial analysis is crucial for understanding the potential of the material.

02

## Development of Recovery Process

Upon confirming the sample's viability, Auris Noble develops a bespoke process for efficient recovery. This step involves creating a tailored solution that maximizes material yield and value.

03

## Reporting and Proposal Generation

Results from the initial recovery are reported, followed by discussions for ongoing material recovery. Auris Noble then generates and presents a proposal for continual recovery of the stream.

# AEROSPACE MATERIALS MANAGEMENT

## Advanced Material Recovery

Focused on maximizing value from aerospace materials through advanced recovery processes.

## Quality and Compliance

Upholding the highest levels of quality and compliance in aerospace material management.

# PRECIOUS METALS RECLAMATION

**ADVANCED RECOVERY OF  
VALUABLE RESOURCES**

Explore our state-of-the-art processes for reclaiming precious metals from diverse sources, ensuring maximum recovery and sustainability.

# PRECIOUS METALS CHEMICALS

## HIGH-PURITY IRIIDIUM AND RUTHENIUM COMPOUNDS

Explore our exclusive range of Precious Metals Chemicals, featuring top-tier Iridium and Ruthenium salts, crafted for a variety of industrial applications.

# IRIDIUM PRODUCTS

Auris Noble LLC proudly stands as the only domestic company expertly handling both the recovery and refining of Iridium, setting new standards in the industry.

Chlor-Alkali

Membrane  
Electrodes

Fuel Cells

Organoiridium

Ignition Systems

Catalyst Materials

# RHENIUM PRODUCTS AND SERVICES

**ADVANCED RECOVERY AND  
REFINING OF RHENIUM**

Auris Noble excels in the recovery and processing of Rhenium, offering high-quality ammonium perrhenate and rhenium metal pellets, alongside specialized services in material recovery and refining.

# PURE METAL ALLOYS

EXCELLENCE IN EVERY ELEMENT

Auris Noble offers a diverse range of high-quality pure metal alloys, encompassing gold, silver, platinum, palladium, rhodium, iridium, ruthenium, and osmium, each crafted for superior performance and quality.

# CONSULTING SERVICES

Auris Noble provides expert consulting services in precious metal recovery, offering tailored solutions for waste/scrap feeds and specialized project management in various industries.
